Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. Same reference numerals have been used to describe different elements and vice versa (see page 8, paragraphs 2 and 3 of the specification).

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are not very clear. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Objections

4. Claim 1 is objected to because of the following informalities: all occurrence of "an integrated circuit" except the first one should be changed to -- the integrated circuit --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2839

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (5634801).

Johnson (Figures 1-19) shows an apparatus having a housing 20 with a surface 34 approachable by an integrated circuit 32 and a second surface approachable by a load board 28, an S-shaped contact 22 received in a slot of the housing with the first end of the contact engaged by a lead 30 of the circuit 32 and a second engaged by a terminal 38 of the board 28 wherein the contact is biased and the sliding motion of the second end across the terminal is precluded when the contact is moved from a first orientation and a second orientation. Biasing means are elastomers 50, 54. The second end of the contact has a protrusion which contacts a wall of the housing to preclude sliding motion of the second end of the contact across the terminal.
